

RESERVOIR GROUP

Making **Energy**
More Accessible

Reservoir Group is a world-class niche oilfield services company that has been addressing customer challenges for more than 70 years. We partner with E & P operators and large service companies to provide tools and expertise during drilling, completions and production operations. Combining our technical experts, proprietary products, and a high-standard of customer care, we deliver safe, high-quality, and cost-effective solutions. Reservoir Group is a global company headquartered in Houston and has 51 operating locations in 27 countries on six continents.

Coring Solutions

Providing critical insight into information evaluation

Our worldwide team of experts have extensive experience in providing coring solutions onshore and offshore, around the globe, and in every major basin. Combining our more than 70 years of knowledge, robust QHSE and QMS programs, and advanced technical coring systems, we offer a specialized approach to project planning – achieving your targets so that cost efficiencies are realized, and formation evaluation results are improved.

A worker in an orange safety suit and white hard hat is working on a drilling rig. The worker is seen from the side, wearing a blue harness and a white hard hat. The background shows the complex machinery of the drilling rig, including pipes and structural elements. The image is partially obscured by a yellow diagonal line and a blue horizontal bar.

Drilling Tools

Increasing drilling efficiency and enabling longer runs

We know that when it comes to drilling, it's all about being fast and efficient. Our expert drilling teams and proprietary technologies enable us to get you to the zone – safely, quickly, and efficiently. With advanced drilling experience, our drilling solutions have a proven track record of reducing drilling non-productive time (NPT) and enabling longer runs.

Surface Logging Services

Mudlogging, Geosteering, and Advance Geosciences

Reservoir Group's surface logging solutions provide real-time insight into the formation to help maximize production. Our advanced formation evaluation analysts provide extensive expertise in the analysis and interpretation critical data sets for well-specific decisions for a complete formation characterization to increase drilling efficiencies.

Well Intervention

Delivering first-class service and high-quality solutions

We have a proven track record of delivering high-quality services and technologies that addressing well intervention challenges. Our experts provide a wide range of well intervention expertise, from milling and cutting services, composite frac plugs, wellbore cleaning and debris removal, fishing and retrieval services, downhole tool sales, and intelligent well intervention technology.

Well Monitoring

Real-time production data for reservoir optimization

With an international reputation for creating innovative well monitoring products, our tools are used by some of the largest companies in the industry around the world.

Reservoir Group engineers, manufactures, and services high-quality, durable memory gauges to deliver reliable production data – improving reservoir performance.

Our permanent monitoring solutions provide real-time production data for reservoir optimization, enabling real-time insight into business
